

## **Submitted to the Canadian Transportation Agency (Form submission)**

**Subject:** Consultation on proposed changes to strengthen the Air Passenger Protection Regulations

**Name:** Carl Constantine

**Date:** 2023-07-11

People with mobility disability conditions ( wheelchair user ) SHOULD NOT be physically carried up steps to board a plane. At smaller airports ( Fredericton) some airlines ( Sunwing) are not equipped to board wheelchair users in the proper method. The most effective method would be a mobile enclosed vertical lift , which would cover ALL types of planes. Thanks for your time.

Carl.
