Subject : ESA

I fully support regulating the ESA requirements. I have an ESA that I travel with at all times be it air or ground. Not having him would isolate me. When travelling by air my 20 lb dog is tethered to me And travels on my lap at all times. . He travels with a collapseable water dish and even though he is well trained I ensure the added security by having him wear a diaper. I will go above and beyond what is necessary not only for the comfort of me, my ESA but all the passengers and staff. I also try to select a seat that is either premier or a window seat. The vessel is shared by everyone. To me having my ESA dog travel with me is privilege and not a right and I always abide by the rules. If necessary I would pay for my ESA to accompany me on flights - that's how important it is for me. I can only hope that the new regulations will continue to allow ESA to travel. It important not only for me but many others that suffer from certain conditions.

Kindly
Lynne and Dexter
